

THE MEMORY GAME

This week we have prepared a **memory game**. It has 3 levels so that little ones but also big ones can play it: this game of chance is perfect to develop the memory in a fun way!

How does it work?

Print on one side the following 3 pages so that you can turn the cards over to hide the objects. Cut the cards out one by one and now you are ready to play!

- To start, lay out the **blue cards** on the table to remember them.
- After 30 seconds, flip the cards over and it's now your turn to pair them up together.
- Once the game rules are understood, add the **red cards** to add a new challenge. If you are experts, then add the **green cards**!

Ready, set, memorize!
